Work Experience

EDGELAB - LAUSANNE
SOFTWARE ENGINEER   JUNE 2022 – APRIL 2024
· Projects: Worked on three different web applications using technologies such as Java 17, Spring Framework, Angular 2+, JUnit, PostgreSQL, R2DBC, Kotlin/Ktor
· Develop new features in the database, backend, and frontend using Java, Spring, PostgreSQL, Angular, and Kotlin, with a Domain-Driven Design (DDD) approach.
· Extracting prices of financial instruments from various providers.
· Improvement of certain legacy business logics.
· Migration of "read-only" code from JPA to R2DBC

- Deployment of the application using Jenkins.
- Unit and integration testing using JUnit, Mockito, and Docker containers to replicate the production environment
- Reviewing pull requests from my colleagues' tasks on GitHub.
- Monitoring the application using Grafana
- Customer/User Support
- Writing documentation using OpenAPI
- Sprint planning and task estimation.

AFFINITY - LISBON
DEVELOPER JAVA FULLSTACK   **JULY 2019 – MAY 2022**
- Project: Work on a web application for BNP Paribas developed with ExtJS and Vue.js, Java 8, Spring, and Sybase.
- The goal of the application was to enable internal traders to lend and borrow stocks and bonds
- Developing new features as requested by users,
- Bug fixes for the upcoming deployment
- User support, level 3
- Migration of the frontend from Ext.js to Vue.js.

SYONE - LISBON
IT CONSULTANT   **FEBRUARY 2018 – JULY 2019**
- First, I worked on a project for an association aimed at redesigning beds in medical institutions for people with addiction issues
- This project was done using Java 8, Angular, and MySQL
- The second project I worked on involved creating a web application for a union's commercial to establish agreements with medical institutions, allowing union workers to benefit from price discounts
- This project was done using Java 8, Spring Framework, Angular, and MySQL. It was deployed on Azure
- The last project I worked on was a migration from PowerBuilder to .NET.

KANTAR WORLDPANEL - LISBON
SENIOR DATA ANALYST   **APRIL 2016 — FEBRUARY 2018**
- Analysis of buyer behavior data.
- Data quality assurance
- Improvement and enhancement of the quality assurance process
- Writing reports for various clients.
- Participation in the development of new types of panels.
